OUR CEO — FRANK BOHLE

“The future belongs to the bicycle, I am completely convinced of that. It is the central part of tomorrow's mobility.”

WE CAN ONLY MOVE FORWARD TOGETHER

RIGHT NOW

We have been passionate about bicycles for 102 years, and for over 50 years we have specialized in their only point of contact with the ground: the tire. As a family business that combines tradition and modernity. In 2023, we completely redesigned our brand identity and positioned ourselves for the future. A change like this is only gradually becoming visible in retail. I am therefore all the more pleased that we are able to present the next steps on this journey in this catalog.

In the course of the brand relaunch, we dealt intensively with key questions: What do we stand for as a company? What is our drive that is reflected in all our actions and products? Schwalbe and Ralf Bohle GmbH, the company behind the brand, are currently managed by me the third generation, and the next generation is already taking on responsibility in our company.

What is important to all of us? Our Values. Above all, the partnership with specialist retailers - with you. This becomes particularly clear in difficult phases such as the one we are currently going through. It is clear that we can only overcome the current status quo together. And we will certainly succeed, because I am completely convinced that the future belongs to the bicycle. It is the central part of tomorrow's mobility.

And for the mobility of tomorrow, we offer what Schwalbe has always been characterized by: Innovative products that set standards. The Schwalbe Klik Valve solves problems, that have existed for over a century.

However, our products set standards not only in terms of quality, but also in terms of environmental friendliness. A total of 70% of our entire range are already produced from material from recycled tires. Tires in which we use the recycled carbon black that comes directly from our tire recycling. And in which you in the specialist trade also have a decisive share.

The visibility of our new brand image is of course not only evident in our new products, but also in the presentation of the tires. Our new POS system not only enhances Schwalbe products, but also makes the service area as a whole much more attractive. A point that is important for you and for us so that we can move forward together. With this in mind, I wish you and all of us an enjoyable and successful future.

Frank Bohle

ARRIVE BETTER – IN EVERY WAY

We have already attracted a lot of attention with our new brand. And we will continue to do so.

The premiere was pretty exciting: Schwalbe's new appearance at Eurobike 2023 was intended to be a symbol of a better future. It was not only that, but also a complete success, talk of the town and popular with visitors and our employees alike.

Inspired by so much good feedback, it was clear to us that we had started something and wanted to take it further. Full of confidence, even when the going gets tough: We're getting there. Welcome to Eurobike 2024, where we welcomed all people who want to get there better with their bike. Wherever that may be. And once again, we were a crowd puller and the place to go for all those who love the freedom of cycling.

We tell even more stories in our Brand World, where you can experience our brand with all your senses. Get there - is our call. Experience for yourself what is behind Schwalbe. Who develops the products and tests them again and again. And see for yourself what incredible goals have already been achieved with our tires.

By the way: To help you offer your customers the right tires quickly and convincingly, we have launched a new POS system for you. Clear, attractive and of course in the new Schwalbe look. You can order it from us now.

Our new retailer portal also fits in with this, allowing you to get quick and concise answers to all your questions and, of course, give us suggestions.

Because we can only reach our goal together.

A BRAND LIKE US

The development of a brand is initially a very theoretical matter. It becomes really exciting when it comes to life and is lived. When it can tell stories.

Just like the many people who stand behind Schwalbe and those who come into contact with it.

All these experiences together make Schwalbe what it is. They tell of our tireless optimism and our drive to tackle things and make them even better. For tires that take us all further.

"The new brand was quite something. On so many levels. First of all, to find out what really drives us. To see what we really look like. And then to experience how everyone around us confirms to us, that this is exactly who we are: the partners with whom you achieve your goals. Insane."

Philipp Jahn
Head of Marketing and Brand

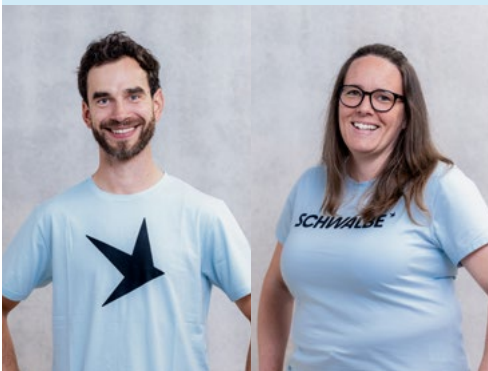

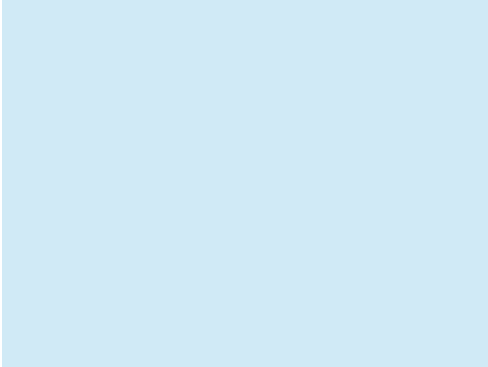

"Then I just get to my desk in the morning and the phone is already ringing. Great, I think, and pick up the phone before I've even had a chance to get my first coffee. And then I'm greeted by a voice full of joy and warmth: 'Mr. Stark, I just wanted to tell you that we've just come from Eurobike. And we spoke to others about it on the train. Your new logo, your new stand, everything - it looks so great and makes us all so proud to sell your tires. Please, bring out the matching packaging very quickly!' I was flabbergasted."

Volker Stark
Support Center/Internal Sales

"Everyone knows Schwalbe now. But when I showed up at my dealers for the first time with the new jacket and the new logo, it was a very special moment. Pleased faces and respectful nods. The brand tells so many stories that I always had to tell myself before."

Andreas Breuer
Sales representative

"The feedback on our already implemented and planned POS initiatives has been consistently positive. Our incentive is huge to now implement the various POS materials and store system solutions step by step. In some cases, this may take some time, as we currently have a unique opportunity: We can completely rethink many solutions in the light of the new brand. I ask for your understanding. I am sure that our new brand presence will have an optimal effect at the POS."

Philipp Hawle
Point of Sale Manager

"It is exactly what we have been searching for. A brand identity that even better represents the values and capabilities of the company. An expression of Schwalbe's optimistic style and the collaborative way in which we work. A logo that stands out from the crowd and is befitting the market-leading, environmentally friendly products we produce. No matter where you want to go, we will help you get there!"

Erik Swinburson
Managing Director Schwalbe Tires
North America

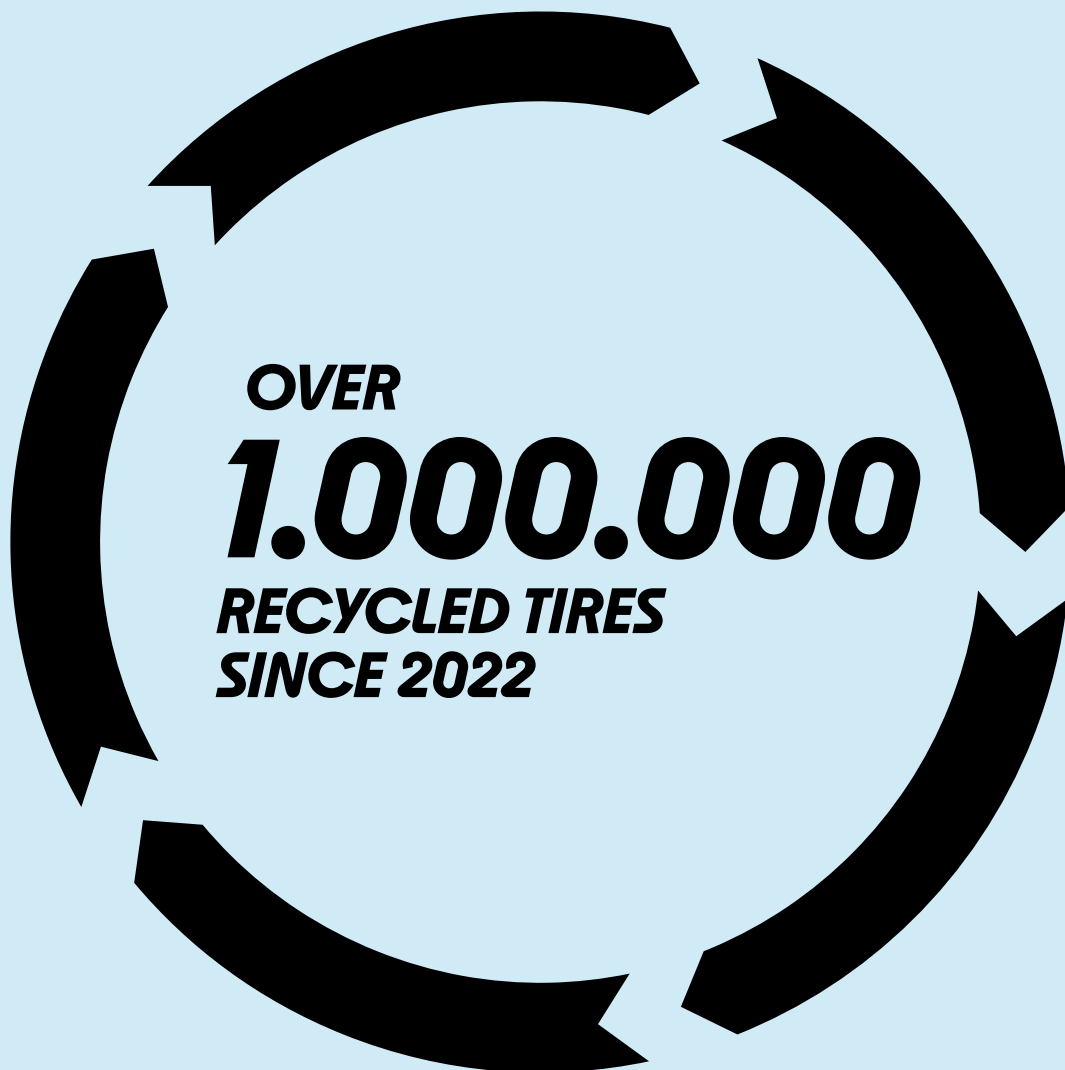

"Just do it. That's what counts. Whether we're celebrating a World Cup victory or raving about a bike tour through the countryside. Our new brand is just as concise and authentic as we need it to be on social media. And what really surprised me: Despite the general impression that the web is no longer beautiful - the reactions to our relaunch were so consistently positive that you can definitely still have hope. But we have hope anyway."

Stephanie Bieker
Social Media Manager

JOIN THE RECYCLISTS

5 STEPS TO THE RECIRCULATING TIRE

1 COLLECTION

Specialist dealers collect used tires of all brands in the Schwalbe recycling box.

2 TRANSPORTATION

The used tires are transported to our recycling partner Pyrum Innovations.

3 SHREDDING

Shredding the used tires. This separates the steel and fabric from the rubber granulate.

MILESTONE IN RECYCLING

In July 2024, the time had come: since the introduction of our 2022 recycling system, we have successfully collected, recycled and reintroduced over one million tires back into the cycle. A milestone in our company history that would not have been possible without our dedicated specialist dealers.

Many thanks to everyone who is already a ReCyclist.

TIRES IN THE CYCLE

We are very proud of the fact that currently 70% of our entire range of tires are already circular tires. In these tires, we replace conventional carbon black with recycled carbon black (rCB) from our own tire recycling. They meet 100% of our high quality standards and impress with their performance. This process is already technically successful for all our rubber compounds except for the ADDIX Ultra Soft. In this way, we are increasingly saying goodbye to petroleum-based primary raw materials and reducing our CO₂ emissions by 80% at the same time.

And as part of the specialist trade, you can score double points with your customers: By becoming part of our circular economy, you actively support climate protection. At the same time, you are answering the question of disposal for your customers.

CSR REPORT

We don't just take responsibility with our tire recycling. Our new CSR report shows you what else we are committed to.

4 PYRUM THERMOLYSIS

Conversion of rubber granulate into valuable secondary raw materials: gas, oil, recycled carbon black (rCB).

5 RETURN

The recycled carbon black (rCB) is used for the production of new tires.

JOIN IN

Over 1800 dealers are already involved in the unique Schwalbe Recycling program. Become a ReCyclist and be part of this great movement for more sustainability. Tire recycling service is currently only available in Germany.

SCHWALBE PROTECTION TOUR

7 SMARTGUARD / SMARTDUALGUARD

unplattbar®

The safest puncture protection available for bicycle tires.

- Made from highly elastic special rubber
- 5 mm puncture protection insert

The safest puncture protection, especially for e-bike tires.

- Made from highly elastic special rubber
- 4 mm puncture protection insert plus two layers of nylon fabric (RaceGuard®)

Only tires with SMARTGUARD® and SMART DUALGUARD can call themselves unplattbar® (flat-less). You can never completely rule out a puncture. However, the Marathon Plus bicycle tire offers the best possible protection against typical punctures such as glass shards or flints. Always use a pressure gauge to set the air pressure on all Marathon Plus tires. Due to the special construction, checking the pressure with your thumb is not sufficient.

6+ SUPER DEFENSE

Reliable puncture protection under high loads, specially developed for cargo bikes.

- Reinforced construction
- 6-ply 67 EPI double carcass

6 DOUBLE DEFENSE

Extra safety thanks to combined puncture protection under the tread and on the sidewalls.

DD, V-GUARD

- Tread: lightweight and cut-resistant high-tech fiber (V-Guard)
- Side walls: Snake-Skin fabric

DD, GREENGUARD®

- Tread: 3 mm puncture protection insert with recycled material (GreenGuard®)
- Side walls: Snake-Skin fabric

DD, RACEGUARD®

- Tread: puncture protection belt made from two layers of double-layered nylon fabric (RaceGuard®)
- All-round snake-skin fabric

5 V-GUARD	5 GREENGUARD	5 PUNCTUREGUARD®
Ideal puncture protection for light race and touring tires. - Puncture protection belt made of lightweight and cut-resistant high-tech fiber	Recycled puncture protection insert made from natural rubber. - 3 mm puncture protection insert with recycled material	Reliable puncture protection for the entry-level segment. - 3 mm puncture protection insert
		

4 RACEGUARD®	3 K-GUARD	2 67 EPI CARCASS	1 50 EPI CARCASS
Reliable puncture protection for fast and light tires. - Puncture protection belt made from double-layered nylon fabric	Basic puncture protection. - Puncture protection insert made from fiber-reinforced natural rubber	Tightly woven nylon cord ensures high puncture resistance. - Tires become smoother, overall performance increases	Minimum standard for all Schwalbe tires. - With 50 EPI, significantly higher fabric density than competitors
			

The minimum standard for Schwalbe TOUR tires is level 3 and an additional protective belt is the perfect complement to the high-quality carcass.

MTB CONSTRUCTIONS

MTB CONSTRUCTIONS

Our tried and tested tire designs - 100% matched to their respective area of application.

SUPER RACE

The ultimate competition design for XC racers - when speed counts.

SUPER GROUND

Our improved SnakeSkin construction for a wide range of applications - from XC to All Mountain.

CONFIDENTLY TO THE GOAL

Confidently to the goal

At Schwalbe, we make tires that get you to your destination. To give you the best possible support before and after the purchase of the perfect Schwalbe product for you, we offer you two digital tools: the Tire Advisor and our Schwalbe Pressure Guide. And to precisely dial in your tire pressure, discover the revolutionary Schwalbe Clik Valve.

1

SCHWALBE TIRE ADVISOR ***Finding the perfect tire***

The only connection between the bike and the ground are the tires. No other part of the bike influences the riding experience as much as they do. They have a disproportionate influence on whether the performance of the bike and cyclist can be fully exploited.

With the Schwalbe tire advisor, you can easily find out which bike tire you need. The tool helps you to find the perfect tire for all occasions - be it for your mountain bike, trekking bike or road bike. No more long searches. Get started right away and see the best options for your intended use!

Find the right tire for your bike and your exact requirements quickly, easily and in just a few steps.

2

SCHWALBE PRESSURE GUIDE ***Ride with the right tire pressure***

Once the right tire has been found, it is important to determine the air pressure individually, as this is the only way the tires can show their full performance.

Bicycles are rarely ridden with the correct air pressure. Many cyclists have significantly too much or too little air in their tires and are therefore unable to make the most of the performance of the tire or the bike. With our tool, the Schwalbe Pressure Guide, the optimum air pressure in the tire can be calculated quickly and easily.

Click here for the
Schwalbe Pressure Guide

Google Play

App Store

Download the Schwalbe Airmax app and calculate your ideal air pressure.

3

SCHWALBE CLIK VALVE
*Easy inflation thanks
to new valve system*

It's finally here: the long overdue development that makes inflation easier for everyone! The SCHWALBE CLIK VALVE (SCV) is THE revolution for bicycle valves and solves problems that have existed for over a century.

The principle of the SCHWALBE CLIK VALVE is very simple: it works intuitively with a click. What does it need? The valve and the corresponding pump head or pump head adapter. With the Clik Valve, this can be clicked onto the bicycle valve with minimal force and removed again very easily after successful inflation.

Find out more about the advantages of Schwalbe Clik Valve and how the conversion works.

CITY TOUR

BEST USE

Kerbs, debris and gravel paths: with Schwalbe you simply glide over everything. For more than 40 years, Schwalbe's Marathon tires have set highest standard in puncture protection and mileage. Also for e-bikes.

MARATHON PLUS TOUR

The Flat-less tire with a distinctive trekking profile

- Robust construction and modern profile design
- Versatile – suitable for asphalt, unpaved paths, and light terrain
- SmartGuard: Uses the proven construction of the Marathon Plus (classic sizes)
- Smart DualGuard: Reinforced sidewall allows for higher load capacities, proven construction of the Marathon E-Plus (E-bike sizes)
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

GREEN MARATHON

The pioneer in puncture protection, mileage, and environmental friendliness

- Schwalbe's most environmentally friendly bicycle tire
- Produced exclusively with Fair Rubber
- 99% free of harmful substances*
- Made of 80% recycled and renewable materials:
including the first tire with carbon black from recycled bicycle tires (rCB)
- 41% reduced CO₂ footprint
- Very good puncture protection thanks to GreenGuard
- Modern and sporty tread design
- Recommended for bikes and e-bikes

① * 99% free of harmful substances does not mean that the remaining 1% is harmful. The materials that fall under this category include not only the harmful substances themselves but also harmless raw materials that contain small amounts of harmful substances. Since these substances are encapsulated in the tire rubber, they pose no danger at all.

MARATHON ALMOTION

The state-of-the-art touring tire

- Very good puncture protection which is both effective and lightweight
- Excellent riding characteristics on asphalt and paved roads
- Available in three sizes as a tubeless variant
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

① The TLE tire is specifically designed for tubeless applications without a tube, offering the best performance by far. All Schwalbe TLR/TLE tires must always be used with sealant in a tubeless setup.

NEW

SMART SAM CARGO

The cargo tire for a combination of on- and off-road

- Perfect choice for rural areas
- Smart Sam profile guarantees low rolling resistance and safety off-road
- Suitable for very high loads
- Safest puncture protection for cargo bikes through six-layer 67-EPI Super Defense casing
- Manufactured with recycled carbon black (rCB) from Schwalbe's own tire recycling

SCHWALBE PICK-UP

Our best cargo tire

- Schwalbe's first cargo bike specific tire
- Very stable and safe
- Suitable for very high loads
- Safest puncture protection for cargo bikes through six-layer 67-EPI Super Defense casing
- Produced with fair trade rubber
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

SUV

BEST USE

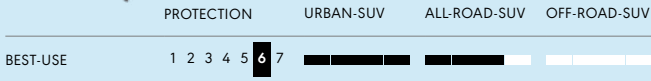

Tires for a bike that can be all things to everyone, over long distances with maximum comfort, and safe and sporty handling, whether on asphalt or off-road. Schwalbe was the first manufacturer to develop SUV-specific tires and bring Marathon puncture resistance to off-road riding - an important requirement for all E-SUV bikes.

A full-page photograph of a male mountain biker in motion. He is wearing a grey and orange long-sleeved jacket, a black helmet, and dark pants. He is riding a mountain bike with red frame elements and black tires. The terrain is a rocky, grassy descent. The background is a hazy, overcast sky. A large, light blue 'MTB' text is superimposed over the center of the image.

In all areas of mountain bike racing, the best athletes in the world challenge us to develop the right tire for their needs. The champions Alessandra Keller, Alan Hatherly (both overall Cross-Country World Cup winners, Hatherly also World Champion), Mona Mitterwallner, Simon Andreassen (both marathon world champions), Myriam Nicole, Amaury Pierron (both with various downhill successes) and Saya Sakakibara (Olympic gold medal) provide the confirmation and motivation for ever newer innovative solutions with their victories. Grip and speed at the limit. Developed with professionals, made for everyone.	Albert	Enduro, Trail				52 NEW

THE RADIAL REVOLUTION

***MORE GRIP
FOR EVEN MORE SAFETY***

***MORE COMFORT
THANKS TO GREATER
COMPLIANCE***

***LARGER CONTACT PATCH
ON THE GROUND***

RADIAL REVOLUTION: REDEFINING MOUNTAIN BIKE TIRES

The latest development from the Schwalbe LAB

The latest development from the Schwalbe LAB: With the innovative radial tire technology, two new MTB tires are released onto the market. The basis for this new technology is the completely rethought carcass construction.

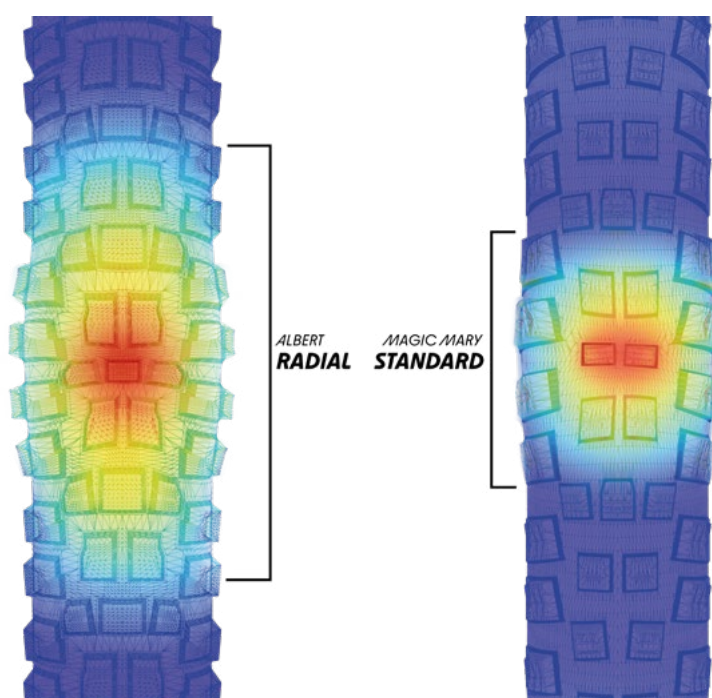

We developed the tires in the Downhill World Cup. Amaury Pierron made a brilliant comeback after his return. With our radial tires, he won in Val di Sole by almost 5 seconds and in Let Gets by over 6 seconds - an eternity in racing.

THE ADVANTAGES OF RADIAL

***CARCASS THREADS AT A MORE OB-
TUSE ANGLE THAN OTHER TIRES***

***30% MORE CONTACT PATCH AREA
WITH THE SAME AIR PRESSURE***

***MORE GRIP, MORE DAMPING,
MORE SAFETY***

WHAT DOES RADIAL MEAN?

The structure of radial tires

With our radial tires, we are turning the MTB world on its head. We have always asked ourselves the following question during development: How can we make the best possible use of the limited contact patch area of a tire? Our answer: a new carcass construction! The carcass threads, which run diagonally across the tire at a 45° angle in conventional bicycle tires, are arranged at a much more obtuse angle in our radial tires. This technology opens up completely new dimensions in the function of bicycle tires.

Point deformation

The carcass material overlaps for a shorter time and with less tension. As a result, the tire deforms more selectively and can react much more flexibly and adaptably to bumps without sacrificing the grip safety factor.

Higher contact surface

Radial tires offer approx. 30% more contact patch area than conventional tires at the same air pressure. Even if the air pressure is increased by 50%, the contact patch area is still 15% larger.

More grip, more damping, more of the trail

The increased contact patch area and more flexible response provide significantly more grip, more damping, more safety and more comfort - so you get more out of the trail! The tire absorbs impacts better and uses the suspension travel more effectively - it literally sucks itself into the ground. This applies to both mountain bikes and e-MTBs, which have significantly more traction on the ground with radial technology.

NEW

ALBERT

Guarantees safety and control in all situations

- Radial carcass enables a larger contact patch area and filters road irregularities significantly better: more grip, more comfort, and more safety.
- Literally clings to the ground as the tire deforms more precisely.
- Tread optimized for radial carcass: many lugs for maximum control and good durability.
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling.*

MAGIC MARY

The legendary downhill and enduro tire with a radial carcass

- Radial carcass allows for a larger contact patch area and filters road irregularities significantly better: more grip, more comfort, and more safety.
- Literally clings to the ground, as the tire deforms more precisely.
- All-rounder for trail, all-mountain, enduro or downhill thanks to versatile tread and grip on all surfaces.
- Kind handling: forgives minor mistakes and allows for more leeway.
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling.*

TACKY CHAN

The fastest downhill tire in the world

- Developed over two years in the World Cup series, including with overall downhill World Cup winner Amaury Pierron
- Optimized for 100% precision
- 10% more stable shoulder knobs compared to the Magic Mary for even more aggressive cornering
- Long braking edges allow for a later braking point
- Open shoulder area provides direct feedback and improves self-cleaning
- Ramps on center knobs for optimal rolling properties
- On average, 8% lighter than the Magic Mary
- Produced with fair-trade rubber
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling*

NEW

RICK

The perfect choice for XC races where every tenth of a second counts

- Developed in collaboration with Olympic silver medalist Mathias Flückiger
- Combines grip and low rolling resistance like no other Schwalbe XC tire
- Reinforced transition area between center and shoulder blocks for optimal SnakeBite protection
- Faster than Racing Ralph and grippier than Thunder Burt
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

SMART SAM

The all-rounder for road and mixed terrain in a modern look

- Perfect compromise for use on the road and off-road
- Optimized riding characteristics for the e-MTBs
- Modern off-road look meets good rolling properties
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling (exceptions: versions with Black'n'Roll and SBC compound not included)

SCHWALBE SX-R

The revolution in BMX racing

- The fastest and lightest BMX race tire in the world: Olympic gold by Saya Sakakibara
- Developed in collaboration with INSPYRE and MEYBO, tested by Niek Kimmann and Jeremy Rencurel
- Already 4 World Cup victories during the development phase
- Optimized tread design for maximum grip out of the gate and in corners

A male cyclist is shown from the waist up, leaning forward in a racing posture on a gravel bike. He is wearing a light blue and grey short-sleeved cycling jersey, black shorts, blue socks, and black shoes. He is also wearing a white helmet. The background is a blurred forest with green trees. The ground is a rocky, gravelly path. The text "GRAVEL CROSS" is overlaid in large, white, bold, sans-serif capital letters across the center of the image.

GRAVEL CROSS

BEST USE

Schwalbe's decades of experience in road bike and MTB tire development come together in Schwalbe's G-ONE gravel line. Amity Rockwell won the Unbound Gravel in the USA in 2019 on the G-ONE Allround. In 2022, Ivar Slik did the same on the G-One RS, which also led Kasia Niewiadoma to victory at the UCI Gravel World Championships in 2023. Whether adrenaline junkies, adventurers or bike travelers - with our gravel and cross tires, everyone can achieve what they want. GET THERE.

ROAD RACE

BEST USE

Schwalbe had the courage to use tubeless technology long before it became mainstream. Thanks to the lowest rolling resistance, you save valuable watts and therefore gain performance with our road bike tires. Kasia Niewiadoma (then Canyon Sram) won the Tour de France Femmes 2024 on the Pro One Aero, triathlete Laura Philipp triumphed at the Ironman World Championship in Nice, Magnus Ditlev set the world's fastest time in Roth. Become One - with road bike tires that perfectly combine performance and comfort.

SCHWALBE PRO ONE AERO FRONT

Next-generation front wheel specific competition tire

- Tested in the wind tunnel, in the lab, and on the road: Elevates racing bike tires to a new level with its aerodynamics
- A total of 20% less air resistance than the Pro One TT (measured at 45 km/h and 28mm tire width) due to a specific front tire contour
- Very good puncture protection thanks to RaceGuard
- Optimized for modern & wider rims >21mm inner width
- Compatible with hookless rims
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

① The tire is specifically designed for tubeless applications without a tube, providing by far the best performance. All Schwalbe TLR/TLE tires must always be used with sealant in a tubeless setup.

SCHWALBE PRO ONE TT

The high-end time trial and triathlon tire

- Super race carcass for comfort and smoothness
- Maximum speed, lowest rolling resistance, and minimal weight
- Pure competition specialist (not designed for training and everyday rides)
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

i To save weight and optimize rolling resistance, the Pro One TT forgoes puncture protection. Therefore, like all Schwalbe tubeless tires, it must always be used with sealant. TT stands for Time Trial.

ROAD RATING

ROLLING ROAD GRIP PROTECTION DURABILITY SOUPLESSE

SCHWALBE ONE 365

The all-season racing bike tire

- Replaces training tire Durano DD
- Newly developed with even more focus on riding dynamics and safety in all seasons
- Reinforced carcass provides higher puncture protection
- High-quality Addix 4-Season compound
- Plenty of grip even at low temperatures
- Good rolling resistance at all temperatures
- Black reflective stripe as a visual highlight and for additional safety in road traffic
- NEW: TLR version, hookless compatible
- Made with recycled carbon black (rCB) from Schwalbe's own tire recycling

① Not ECE-R88 compliant (explanation on p. 115)
The TLR tire is specifically designed for tubeless applications without a tube, providing by far the best performance. All Schwalbe TLR/TLE tires must always be used with sealant in a tubeless setup.

Wheelchair tires are in constant daily use and therefore subject to greater stress than bicycle tires. Whether in everyday life or in (top-level) sports, wheelchair users must be able to rely on them. Schwalbe pays particular attention to this challenge, offering a suitable solution for everyone through years of collaboration with a wide variety of users. The Schwalbe team is particularly proud of this.

WHEEL CHAIR

A man with dark hair and a beard is sitting in a wheelchair, smiling and looking towards the right. He is wearing a black t-shirt, light blue trousers, and white sneakers with blue accents. The wheelchair has large black wheels with yellow spokes and a smaller front wheel. The background shows a modern building with large windows and autumn-colored trees. The ground is paved with light-colored bricks. The text 'WHEEL CHAIR' is overlaid in large, bold, white letters.

MARATHON PLUS WHEELCHAIR

The Flat-less tire for wheelchairs - THE ORIGINAL

- The absolute reference for puncture-proof pneumatic tires on wheelchairs
- With SmartGuard puncture protection: combines the comfort of an pneumatic tire with the puncture resistance of a solid rubber tire
- 2GRIP: Hand-friendly tires thanks to a smooth sidewall (patented and standard on all Schwalbe wheelchair tires)
- Black 'n' Roll: Leaves no black scuff marks on indoor floors - extremely durable
- Produced with fair trade rubber

TUBES

RELIABLE	AIRTIGHT	GROUP TUBE SYSTEM	100% RECYCLABLE
All our inner tubes are valued by bike dealers and cyclists alike for their high reliability. Each inner tube is inflated at the factory for 24 hours and tested for air retention.	When manufacturing butyl tubes, we ensure that the material is extremely pure. As a result, they retain the air pressure significantly longer than other tubes. Our Air Plus tubes set the bar even higher with their particularly high wall thickness and are extremely leak-proof.	A Schwalbe inner tube is particularly elastic and fits several tire dimensions. For this reason, we also call them group tubes. For example, inner tube number 19 is suitable for tire diameters from 27.5" to 29" and widths from 40 mm to 62 mm.	Our inner tubes are 100% recyclable. Every new Schwalbe butyl inner tube consists of around 20% recycled old inner tube. Aerothan tubes are made of 100% thermoplastic polyurethane (TPU) and are also fully recyclable.

AEROTHAN

The high-end alternative

- Sets new standards in every respect
- Around 40% lighter than a comparable Schwalbe Extralight tube made of butyl
- Extremely low rolling resistance - comparable to a tubeless setup
- Increased puncture protection due to high penetration resistance
- Extremely easy to fit and small pack size, therefore perfect as a spare tube
- SV valve

AEROTHAN PLUS

Increased wall thickness

- Same low rolling resistance as with standard Aerothan
- 80% more puncture resistance
- 20% more puncture protection
- 40% higher weight
- SV and AV valve available

EXTRALIGHT

The lightweight tube

- Lower weight
- Same reliability as a Schwalbe standard inner tube
- AV/SV valve

AIR PLUS

The tube with more staying power

- Higher air retention thanks to high proportion of pure butyl rubber
- More puncture protection thanks to around 70% greater wall thickness
- Greater protection against punctures
- AV/SV valve

STANDARD

The safe choice

- Highly air tight and elastic
- High load capacity, puncture safety and riding comfort
- AV/SV/DV-Valve

SCHWALBE CLIK VALVE

TAIPEI CYCLE
d&i awards 2025
by TFC

GOLD

Valve revolution: New Schwalbe Clik Valve

- New SCV valve to become the new industry standard in the medium term
- Very simple and intuitive handling
- Two-finger operation
- Very simple conversion
- One pump for all bikes
- Small pump head also works with children's bikes
- No more bent or broken SV valves
- No wear on the pump head
- No slipping of the pump head, even at high pressure

TIRE BOOSTER

- Perfect for mounting tubeless tires, up to 11 bar pressure
- With mounting strap, attaches directly to floor pump
- Only for SV valves

ART. # 6080.01
59.90 €

Application tips: www.schwalbe.com/en/tubeless

AIRMAX PRO

- Digital air pressure gauge, measures pressures up to max. 11 bar
- Suitable for AV and SV valves, works on DV that have a Schwalbe valve insert

ART. # 6010.01
17.90 €

More information for the right tire pressure on page 16.

SADDLE BAG

- Complete with spare inner tube and two tire levers.

SOS PUMP

- Small pump for emergencies, perfect for jersey pocket or attachment to the frame
- Handy and extremely durable
- Rubber strap provides protection from dirt
- Compatible valve types: AV, SV, SCV

ART. # 6081
85 g, Height 13 cm
34.90 €

DOC BLUE PROFESSIONAL

- Perfect for Schwalbe TLR and TLE tires, produced by Stan's NoTubes
- Easy handling + optimal, fast sealing

	ART. #	€
60 ml	3710.01	7.90
200 ml	3714	12.90
500 ml	3711	23.90

Application: For preventive puncture protection and tubeless conversion.
Filling quantities: Tires from 23 - 60 mm in width = 60 - 90 ml per tire.
Tires from 62 - 100 mm in width = 90 - 120 ml per tire. Shake well! Effective for up to 7 months. Not suitable for major defects cuts/bursts. Tubeless conversion only with tubeless-compatible wheels and tires.

EASY FIT

- Special mounting fluid for bicycle tires
- The liquid can be applied easily and cleanly to the tire bead with a practical sponge applicator

	ART. #	€
Sponge applicator 50 ml	3700	6.90
Refill bottle 1000 ml	3701	19.90

TIRE LEVER

NEW

- New Schwalbe look and even more stable thanks to its curved shape
- Clamping function for difficult to fit tires
- Can be clamped in the spokes
- Additional function: Integrated wrench for unscrewing SV (Pesta) valve core

ART. # 1847.01
Set of 3
4.90 €

(10 sets in retail counter top display box)

GLUELESS PATCHES

- For repairing holes in TPU tubes.
Contains four patches and two alcohol wipes for cleaning.

ART. # 3900.02
4 patches
7.90 €

(20 sets in retail counter top display box)

MULTITOOL

- 13 functions: various hex sizes, T25 Torx, slotted screwdriver, bottle opener, SV valve core, SV valve extension, AV valve core

ART. # 6015.01
109 g
24.90 €

With corrosion-resistant coating.

TREAD CUTTER

- First tread cutter for MTB tires
- Cuts precisely, with a smooth edge and at the desired height

ART. # 6025
29.90 €

Details on the application at: www.schwalbe.com/treadcutter

HIGH-PRESSURE RIM TAPES

Key factor for puncture safety

- Effectively protects the tube from damage and covers the holes of the spoke holes

ADHESIVE RIM TAPE, 50 M ROLL

- Affordable tape, ideal for the workshop

WIDTH	LENGTH	MAX BAR/PSI	ART. #	€
15 mm	50 m	10/145	880002	19.90
19 mm	50 m	10/145	880001	19.90

AIRMAX NEW

SMART BIKE SENSOR (SET OF 2)

- Innovative tire pressure monitoring system with continuous monitoring of tire pressure in real time including warning function (also via LED on the Airmax)
- Determine the perfect tire pressure via the Schwalbe app
- Small and handy: weighs only 12 grams
- With very precise speed sensor and temperature sensor
- Sensor data is transmitted via Bluetooth or ANT+ technology
- Compatible with SV (Presta) tubeless valves, tubes with SV (Presta) threaded shaft and Schwalbe Klik Valve
- Can be used with inner tube and tubeless setup
- Maximum pressure: 10 bar

VALVE-EXTENSION

- For Schwalbe (Presta) valves and Schwalbe Klik Valve
- Suitable for tubes and tubeless valves with replaceable valve core
- Made of aluminum

LENGTH	COLOR	THREAD	SET	ART. #	€
30 mm	Black	yes	2	3461	9.90
65 mm	Black	yes	2	3462	11.90

The valve extensions are tubeless-compatible.

ART. #	€
6012	199.00

TUBELESS-VALVES

- SV (Presta): Set of 2 with easy handling, the right valve for every rim height
- Valve base can be firmly mounted in the rim with an Allen (Hex) key (4 mm)
- SCV: For intuitive and easy inflation with a click
- 50% higher air flow rate than conventional tubeless valves

QUALITY LINE

PRO LINE	The addition "PRO" distinguishes the tires from the standard range, and stands for exceptional performance. This replaces the Evolution line. Older tires will be converted over the next few years.
EVOLUTION LINE	The best that is possible. Highest quality materials. The latest technology.

NOTES

MTB CONSTRUCTIONS TUBELESS	A detailed overview of our MTB carcass constructions can be found on page 14/15. No inner tube is required. The tire and rim are designed to seal directly against each other. Tubeless tires can also be ridden with an inner tube.
TUBELESS EASY (TLE)	Will be uniformly replaced by Tubeless Ready (TLR) in the future. These tires can be converted to tubeless tires using sealant.
TUBELESS READY (TLR)	Will be used uniformly in the future for all tires where we recommend tubeless use with sealant for the best performance.
SOUPLESSE	Stands for suppleness and lightness when riding gravel and road bikes. Describes the ideal feedback from the ground to the rider.
FAIR RUBBER	Schwalbe is the first tire manufacturer to offer products with fairly traded rubber. Schwalbe pays a fair rubber premium on every kilo of rubber. This is used exclusively to improve the living conditions of small farmers and their families.

COMPOUNDS (RUBBER COMPOUND)

ADDIX	Newly developed high-performance compounds. The best rubber compounds from Schwalbe. For MTB (Speed, Speedgrip, Soft, Ultra Soft), road bike (Addix Race) and e-bike tires (Addix-E). Addix is also available in the Performance Line.
MID	Previously known as ADDIX Speedgrip - our universal compound has been renamed MID.
BLACK'N ROLL	Special rubber compound for wheelchair tires. Leaves no dark abrasion marks on indoor floors. Lasts significantly longer than a gray wheelchair compound.
ADDIX ECO	The most environmentally friendly rubber compound with consistent performance. Contains recycled carbon black from used bicycle tires + 100% natural rubber.
ADDIX FOUR SEASON	Extremely versatile rubber compound, specially adapted to the conditions of year-round use.
GRC	Grey rubber compound for wheelchair tires.
GREEN COMPOUND	A rubber compound made with polymers exclusively from renewable and recycled raw materials.
SBC	Schwalbe Basic Compound: The versatile quality compound for all areas of use.
SILICA	Special filler in the rubber compound that has a positive effect on rolling resistance and wet grip.
WINTER	Special rubber compound for studded tires.
WHEELSTAR COMPOUND	The speed rubber compound especially for wheelchair racers.
SEAL	Installation: tubeless (TLR/TLE) or tube only type

57-622	ADVANCER HYBRID, HURRICANE, ICE SPIKER PRO, MAGIC MARY, MARATHON PLUS MTB, NOBBY NIC, RACING RALPH, RACING RAY, RAPID ROB, RICK, ROCKET RON, SCHWALBE G-ONE ALLROUND, SMART SAM, SMART SAM PLUS, THUNDER BURT, TOUGH TOM, WICKED WILL	19, 19A, 19AP, 19+AP, 19E, 19F, 19L
60-622	ADVANCER HYBRID, AL GROUND, DIRTY DAN, HANS DAMPF, JOHNNY WATTS, JOHNNY WATTS 365, JOHNNY WATTS LR, MARATHON PLUS MTB, RACING RALPH, RACING RAY, ROCKET RON, SCHWALBE G-ONE SPEED, SMART SAM, SMART SAM PLUS, THUNDER BURT, TOUGH TOM	19, 19A, 19AP, 19+AP, 19E, 19F, 19L
62-622	BIG BETTY, EDDY CURRET FRONT, HURRICANE, MAGIC MARY, NOBBY NIC, RICK, WICKED WILL, TACKY CHAN	19, 19A, 19AP, 19+AP, 19E, 19F, 19L
63-622	ALBERT, MAGIC MARY	19+AP, 19F, 19FE, 19L
64-622	SHREDDA FRONT, SHREDDA REAR	19+AP, 19F, 19FE, 19L
65-622	ADVANCER HYBRID, ALBERT, BIG BETTY, EDDY CURRENT FRONT, EDDY CURRENT REAR, HANS DAMPF, ICE SPIKER PRO, JOHNNY WATTS, JOHNNY WATTS LR, JOHNNY WATTS 365, MAGIC MARY, MARATHON PLUS MTB, NOBBY NIC, SMART SAM, TOUGH TOM, WICKED WILL	19+AP, 19F, 19FE, 19L

SIGN EXPLANATION

TLR/TLE	Optimum performance (rolling resistance and puncture protection) in tubeless use with Doc Blue, can also be used with inner tubes. All TLR/TLE are approved for use on hookless rims.
TUBE ONLY	Can only be used with a tube.
E-BIKE	Recommendation for the use of a tire on e-bikes. For normal, slow pedelecs (E-25), or for fast S-pedelecs, see ECE-R75 or B. Please check the information on the tire to see whether it has ECE-R75 or B approval.
ECE-R75	Offers the advantage of a higher total weight due to special coding (e.g. "28B"). Indicates the maximum load capacity and the maximum speed. This information is a number and letter code specified by the Federal Motor Transport Authority (KBA) (e.g. 28 = 100 kg) and (e.g. B = 50 km/h). It can be recognized by the check digit, which begins with a circled E4 and then 75R...
ECE-R88	The European test mark certifies that the reflective strip meets the legal requirements. This is the case with the silver reflective strip, while the black one does not quite meet them in terms of reflective strength. Additional approved spoke reflectors are required for StVZO-compliant equipment.
COMPOUND	Rubber compound
EPI	Carcass density. Ends per inch (threads per inch). The denser the carcass, the higher the quality of the tire. A T in front of the number indicates a tubular tire carcass; these are only comparable to a limited extent. The material and manufacturing method differ significantly.
LOAD	Maximum load capacity. Applies per tire at max. air pressure.
€	Recommended retail price in Euro incl. VAT.
