MOVING CONFIDENCE - FOR OVER 100 YEARS

1922	1973	1983	2000	2002
Eugen and Willy Bohle found a company for the export of bicycle components	Concentration on bicycle tires: Ralf Bohle establishes the Schwalbe brand	Uncompromising quality: Development of the Schwalbe Marathon	Frank Bohle takes over as third generation to run the family company	Milestone environmentally friendly tire development: Unplattbar (Flat-less) tire Marathon Plus

CONFIDENCE MOVES US FORWARD – ALL OF US.

In addition to the driving force of our legs, it has always been our own confidence that drives and moves us. We at Schwalbe know that we can always make even better tires. For urban everyday life, for the next mountain tour, for the rough downhill trail.

We want to develop tires that not only work well, but are groundbreaking in their impact on the environment. Because we are sure that we can achieve an even greater goal: A better future for everyone. That's what we enjoy working on every day, with complete conviction.

That's why we always give free rein to our urge to develop: we dream, we tinker, we try, we improve, we test - always. We fall on our face and get up again.

Because we know: There is always more. We can always do better.

The epicenter of this is our unique development approach: the Schwalbe Lab. Here, we use all our experience and the latest technology to work on answers to social change. Because we want to set a positive example for the future. Here we design the latest tires in elaborate test series and material trials and test them with sports teams on the road or off-road.

2015

Start of tube recycling: 100% recycling of the tube possible

2020

Aerothan material revolutionizes the tube market and saves 40% in weight

2021

Schwalbe moves into a fully sustainably built company building

2022

The Schwalbe recycling system for all tires – from all brands – is created

2023

Green Marathon – the first sustainable tire is introduced

We want to infect others with our own confidence. We want you to feel this optimism that moves us so much. All we have to do is get started and then we can achieve anything. Tires that roll off the line even more perfectly. That perform even better. That use fewer resources and are made of renewable and recyclable materials. To make you happier. To enable more outstanding performance.

We, the team at Schwalbe, are completely passionate about this vision. That's why it's now visible in our new look. Because we want to make the confidence that drives us tangible for everyone.

GET THERE

WE MAKE TIRES THAT TAKE YOU WHERE YOU WANT TO GO. TO SCHOOL, TO THE OFFICE, UP A MOUNTAIN OR JUST FAR AWAY.

YOU WON'T ALWAYS FIND THAT PLACE ON GOOGLE MAPS. SOMETIMES IT'S MORE A FEELING. OF FREEDOM AND NEW POSSIBILITIES. OF OPTIMISM. THE DREAM OF TOMORROW.

EXACTLY THIS FEELING DRIVES US TO TACKLE THINGS AND TO MAKE THINGS BETTER. WE MAKE TIRES THAT GET YOU FROM A TO B, WHEREVER B IS. YOU CAN RELY ON FOR EVERY RIDE. ON EVERY RIDE. WE MAKE TIRES THAT ARE KINDER FOR OUR PLANET. MADE FROM RECYCLED, RENEWABLE MATERIALS. WE MAKE TIRES THAT TAKE YOU FURTHER AND BEYOND. WITH WHICH YOU CAN ACHIEVE ANYTHING.

**WHEREVER YOU WANT TO GO IN LIFE
THERE ARE NO LIMITS:
GET THERE**

RECYCLISTS[★] REIMAGINE TOMORROW

Cycling has been experiencing a justified boom for years because it simply fits perfectly into our times. Today, it is much more than just a fascinating sport and environmentally friendly means of transportation. It is individual and social, frees you up and keeps you fit. And it has become a culture all of its own.

A culture that we want to further strengthen and constantly revive through maximum material optimization. A culture that thrives on the diversity of its people. Because hipsters and golden agers alike love uncomplicated, individual transportation. Mileage junkies and altitude freaks are looking for a challenge. Families and companies are happy about the more sustainable alternative to the car.

Because we are all ReCyclists. Bicycle fans who understand and think of cycling in a new way. We believe in a better way of living together, better health, a better environment in a better future – all through cycling.

That's what we get on our bikes for every day. That's why we at Schwalbe are constantly working on new ideas and making a decisive difference with our tires. We recycle tubes and now also complete tires.

Taking responsibility is not a trend for us, but a principle we live by. Even in our new, environmentally friendly company building. And now we are bringing a small revolution to the market:

Green Marathon - the most environmentally friendly tire where you don't have to compromise. A true natural tire with the minimum possible CO₂ footprint. Made possible by maximum sustainability in materials and production. Developed together with our technology and production partners and the firm conviction that it can be better after all.

Let's get things moving.
Let's establish a new culture of cycling.
Let's be ReCyclists together.
Let's start now.
GET THERE

SCHWALBE PROTECTION TOUR

7

SMARTGUARD® / SMART DUALGUARD

unplattbar®

The safest puncture protection available for bicycle tires.

- Made of highly elastic special rubber
- 5mm puncture protection insert

The safest puncture protection, especially for e-bike tires

- Made of highly elastic special rubber
- 4mm puncture protection insert plus two layers of nylon fabric (RaceGuard®)

Only tires with SMARTGUARD® and SMART DUALGUARD can call themselves flat-less. You can never completely rule out a flat tire. Against the typical puncture gremlins such as glass shards or flint granules with the Marathon Plus however, you are very well protected. With all Marathon Plus tires it is necessary to use a pressure gauge to adjust the air pressure. Due to the special design a pressure test by thumb is not sufficient.

6+

SUPER DEFENSE

Secure puncture protection at high loads, specially designed for cargo bikes.

- Reinforced construction
- 6-ply double carcass

6

DOUBLE DEFENSE

Extra safe due to combined puncture protection under the tread and on the sidewalls.

DD, V-GUARD

- Tread: lightweight and cut-resistant high-tech fiber (V-Guard)
- Sidewalls: Snake-Skin fabric

DD, GREENGUARD®

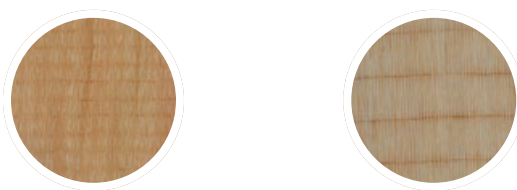

- Tread: 3 mm puncture protection insert with recycled material (GreenGuard®)
- Sidewalls: Snake-Skin fabric

DD, RACEGUARD®

- Tread: Puncture protection belt made of two layers of double laid nylon fabric.
- Snake skin fabric all around

5	V-GUARD	5	GREENGUARD	5	PUNCTUREGUARD®
	Ideal puncture protection for lightweight race and touring tires - Puncture protection belt made of lightweight and cut-resistant high-tech fiber		Recycled puncture protection insert made of natural rubber. - 3mm puncture protection insert with recycled material		Reliable puncture protection for the entry level. - 3mm puncture protection insert
					

4	RACEGUARD®	3	K-GUARD	2	67 EPI CARCASS	1	50 EPI CARCASS
	Reliable puncture protection for fast and light tires. - Puncture protection belt made of double laid nylon fabric		Basic puncture protection. - Puncture protection insert made of fiber-reinforced natural rubber		At 67 EPI, denser woven nylon cord provides already high puncture resistance. - Tire becomes more supple, overall performance increased		The minimum standard for Schwalbe TOUR tires is level 3. - An additional protective belt is a perfect complement to the high-quality carcass.
							

The minimum standard for Schwalbe TOUR tires is level 3. An additionally protective belt is a perfect complement to the high-quality carcass.

THE SUPER 5

THE SUPER 5 MTB CONSTRUCTIONS

Five new tire constructions that change everything.
100% tailored to your needs.

SUPER RACE

The ultimate competition construction for XC racers – when speed matters.

SUPER GROUND

Our improved SnakeSkin construction for a wide range of applications – from XC to All Mountain.

● ● ● ● ●

● ● ● ● ●

LIGHTWEIGHT

● ● ● ● ●

● ● ● ● ●

PUNCTURE PROTECTION

SUPER TRAIL

Our most versatile construction, built for riding fun from All Mountain to Enduro.

● ● ● ● ●

● ● ● ● ●

SUPER GRAVITY

For everyone attaching utmost importance to downhill performance and for whom a pure Downhill tire is too heavy.

● ● ● ● ●

● ● ● ● ●

SUPER DOWNHILL

Uncompromising stability for DH racing at the limit.

● ● ● ● ●

● ● ● ● ●

ROAD RACE AND GRAVEL

Tread Wear Indicator (TWI)

Turn-Up Construction

Sealing Lip

V-Guard Puncture Protection

3-layered Sidewall

SUPER RACE CARCASS - ROAD AND GRAVEL

The turn-up construction integrates Tubeless Easy technology in the most advanced way. This makes the tire so incomparably smooth and comfortable. The ride feels like the silky smooth behavior of a classic tubular tire. Used on the models of the Schwalbe Pro One series - Pro One TLE, Pro One Tube Type, Pro One TT. Used on Schwalbe G-One series models - G-One RS, G-One R. All TLE models are approved for use on hookless rims.

Snake Skin

Chafer

3 carcass layers

Kevlar bead core

SUPER GROUND CARCASS- GRAVEL

The Super-Ground carcass construction offers the ideal balance of safety and weight. Thanks to a puncture protection insert from bead to bead, this construction is particularly resistant. This makes the Super Ground carcass ideal for gravel use. Used in the models of the Schwalbe G-One series - G-One Speed, G-One Allround, G-One Bite, G-One Ultrabite and G-One Overland. All TLE models are approved for use on hookless rims.

THE COMPOUND FOR MTB TIRES

ADDIX makes all of our legendary Evolution mountain bike tires better. The perfect compound for every demand: SPEED, SPEEDGRIP, SOFT, ULTRA SOFT. The tests in the lab and in the field demonstrate: ADDIX performs better than any other compound before – in all disciplines: XC, AM and TRAIL, ENDURO and DOWNHILL. ADDIX is immediately recognizable by the label on the sidewall and the colored stripe in the tread.

ADDIX ULTRA SOFT

is the ADDIX compound for hardcore use in enduro and downhill. It has sensationally good damping properties and also performs perfectly in cold weather.

ADDIX SOFT

is a compound that bridges many disciplines. In the Enduro and downhill world, in all-mountain and trail riding.

ADDIX SPEEDGRIP

is the universal compound. It has the widest range of use. Perfect for XC, AM and Trail.

ADDIX SPEED

is the compound for XC race specialists. It catapults our XC tires into a new performance dimension.

THE COMPOUND FOR TOURING, ROAD OR GRAVEL TIRES AND MTB PERFORMANCE TIRES

ADDIX ECO

The most environmentally friendly rubber compound with consistent performance. Contains among other things recycled industrial carbon black from used bicycle tires + 100% natural rubber.

ADDIX PERFORMANCE

Very durable universal compound for tires in the performance line with a wide range of requirements.

ADDIX RACE

Extra strong grip at high cornering speeds combined with long durability in E-mode.

ADDIX E

Developed for e-bikes: Compound with maximum durability, low rolling resistance and extremely good grip even at high speed.

ADDIX FOUR SEASON

Extremely versatile rubber compound, specially adapted to conditions in year-round use.

CITY TOUR

BEST USE

Curbs, splinters and gravel roads:
With Schwalbe you glide over
everything. For 40 years, Schwalbe
has set the highest standards
in puncture protection and mileage
with the Marathon tire series.
Also for e-bikes.

NEW E25 E50

GREEN MARATHON

The pioneer in puncture protection, mileage and environmental friendliness

- Very good puncture protection thanks to GreenGuard
- Most environmentally friendly bicycle tire:
- Produced entirely from Fair Rubber
- Consists of 70% recycled or renewable materials:
- Among other things, the first and only tire with carbon black from recycled bicycle tires (rCB)
- 98% pollution-free
- Modern and sporty tread design
- Recommended for bikes and e-bikes

BEST USE

In all areas of mountain bike racing, the best athletes in the world challenge us to develop the right tire for their demands. The winners of the overall World Cup rankings Alessandra Keller and Alan Hatherly (cross-country short track), Camille Balanche and Amaury Pierron (downhill) and marathon runner-up Andreas Seewald provide, with their victories, the confirmation and motivation for ever newer innovative solutions. Grip and speed at the limit. For professionals and hobby bikers.

TACKY CHAN

The fastest downhill tire in the world

- Developed over two years in the World Cup races, including with DH overall World Cup winner Amaury Pierron
- Optimized 100% for precision
- 10% more stable shoulder lugs compared to the Magic Mary for even more aggressive cornering
- Long braking edges allow later braking point
- Open shoulder area provides direct feedback and improves self-cleaning
- Ramps on center lugs for optimal rolling characteristics
- On average 8% lighter than Magic Mary
- Produced with fair trade rubber

MAGIC MARY

The legendary downhill and enduro tire

- The downhill legend, on which among others Danny Hart, Stevie Smith or Myriam Nicole celebrated their greatest successes
- All-rounder for trail, AM to Enduro or DH thanks to versatile profile and adhesion on all surfaces
- Good-natured: Forgives even minor mistakes and leaves more room for maneuver
- Produced with fair trade rubber

A man wearing a white helmet, sunglasses, and a dark jacket is riding a mountain bike. The bike has a green bag on the handlebars. The background is a blurred, natural outdoor setting. The text 'suV' is overlaid in a large, light blue, sans-serif font, with the 'V' being italicized.

suV

BEST USE

Tires for a bike that can and could do anything, over long distances with maximum comfort, safety and sporty handling, whether on asphalt or off-road. Schwalbe was the first manufacturer to develop SUV-specific tires and bring marathon puncture resistance off-road. A particularly important distinction for all E-SUV bikes.

A man wearing a green helmet, sunglasses, and a grey long-sleeved shirt is riding a gravel bike on a dirt path. The path is surrounded by dry grass and shrubs. In the background, there is a body of water and a clear blue sky. The text "GRAVEL CROSS" is overlaid in large, white, bold letters.

GRAVEL CROSS

BEST USE

Schwalbe's decades of experience from road bike and MTB tire development combines in the Schwalbe G-One gravel tire line. Right off the bat, Amity Rockwell won the unofficial world championship, the Unbound in the USA, on the G-One Allround in 2019. The different variants of Schwalbe gravel tires leave nothing to be desired, whether for adventurers, bikepackers or lactate junkies. Each and everyone finds their perfect tire. Just GET THERE.

A close-up photograph of a male cyclist in a yellow and red jersey, wearing a yellow helmet and sunglasses, riding a road bike. The cyclist is looking forward with a determined expression. The jersey features a large white 'X' on the chest and 'Uno' on the sleeves. The bike has 'DARE' on the handlebars and 'SHIMANO' on the front fork. The background is blurred, showing a crowd of spectators.

PAGE

Schwalbe had the courage to adopt tubeless technology long before it became mainstream. Through the lowest rolling resistance, our road bike tires save valuable watts, and thus power thanks to Formula 1 technology. This led Patrick Lange to win the Ironman Hawaii twice in succession - each time with a course record! That level of performance and comfort in one tire sets a new standard thanks to the unique Soudplesse carcass development for road cyclists.

THINGS YOU SHOULD KNOW ABOUT SPIKED TIRES

Can it also be ridden on a normal road?

Without any problem, but if the road is only rarely covered with snow the resulting tire noise may prove annoying.
HINT: At maximum pressure the tires can be ridden on ice-free roads with minimal road noise.

And it won't slide out in cornering?

No. The spikes 'claw' really well into normal asphalt roads and even fast cornering is not a problem. HINT: The spikes work best on ice when running at minimum pressure.

Aren't spikes illegal?

Bike tire spikes are no problem. Only motor vehicles spikes are prohibited in some countries because they damage the road. Fast E-bikes are however considered motor vehicles.

Do the tires have to be run in?

In order to ensure that spikes are permanently fixed, tires should be run in for about 40km on asphalt, while avoiding any fast acceleration or heavy braking.

What is the lifespan of the spikes?

All Schwalbe spikes have a core made of extremely hard wearing tungsten carbide, so they can cover a few thousand kilometers. It is normal for the spike edges to round off and for them to become more deeply embedded.

What are the tires' limitations?

In deep snow even spike tires won't help.

In certain areas snow rarely stays around long. Are spike tires still an option?

It would be best to mount the tires on your second bike. Depending upon the morning weather, use the most suitable bike. On icy roads, when even cars are having problems, it is a great feeling to be in full control on spike tires.

Some spikes came out. Can they be replaced?

Yes, we offer a set of replacement spikes incl. tool. Can be easily installed with the special tool.

Wheelchair tires are in continuous use and therefore subject to higher stresses than bicycle tires. Whether in everyday use or in sports, wheelchair users must be able to rely on them. This is a challenge to which Schwalbe pays very special attention and, through years of cooperation with a wide variety of users, offers a suitable solution for everyone. The Schwalbe team is particularly proud of this.

WHEEL CHAIR

A full-page photograph of a person in a wheelchair performing a stunt. The person is wearing a black helmet with 'WCMX' and 'MINT' logos, a black t-shirt with a graphic, and black pants. They are in a dynamic pose, leaning forward with one arm extended. The wheelchair is a specialized racing model with large, thin tires. The background is a blurred indoor setting with a blue wall and a person in a blue shirt in the background.

unplattbar®

MARATHON PLUS WHEELCHAIR

The Flat-less® tire for the wheelchair

- The absolute reference for puncture-proof pneumatic tires on wheelchairs
- Flat-less:
Maximum puncture protection
- 2GRIP: Hand-friendly tires thanks to smooth sidewall (patented and standard on all Schwalbe wheel-chair tires)
- Black 'n' Roll: Leaves no black abrasion marks on indoor floors – extremely durable
- Produced with fair trade rubber

	PROTECTION							ROLLING			ROAD GRIP			OFF-ROAD GRIP			DURABILITY

TUBES

RELIABLE

All our tubes are equally appreciated by bicycle dealers and cyclists for their high reliability. Each tube is inflated at the factory for 24 hours and tested for air integrity.

AIRTIGHT

In the production of butyl tubes, we ensure a very high purity of the material. As a result, they hold the air pressure significantly longer than other tubes. Our Air Plus tubes go one step further with their particularly high wall thickness and are extremely tight.

GROUP TUBE SYSTEM

A Schwalbe tube is particularly elastic and fits several tire dimensions. For this reason, we also call it group tube. For example, the tube number 19 is suitable for tire diameters from 27.5" to 29" and widths from 40mm to 62mm.

100% RECYCLABLE

Our tubes are 100% recyclable. Every new Schwalbe butyl tube consists of around 20% recycled inner tube rubber. Aerothan tubes consist of 100% thermoplastic polyurethane (TPU) and are also fully recyclable.

AEROTHAN

The high-end alternative

- Sets new standards in every respect
- About 40% lighter than a comparable Schwalbe Extralight tube made of butyl rubber
- Extremely low rolling resistance; at a similar level to tubeless
- Increased puncture protection due to high puncture resistance
- Fully recyclable, consists of 100% thermoplastic polyurethane (TPU) (including valve)
- Extremely easy to mount and small pack size
- Available for gravel and road bikes, MTBs or all-round use

- NEW**
- Aerothan-Plus tubes with increased wall thickness
 - Same low rolling as standard Aerothan tubes
 - 80% more puncture resistance
 - 20% more snake bite protection
 - 40% higher weight

AIR PLUS

The tube with the longer breath

- Higher air retention thanks to a high proportion of pure butyl rubber
- Greater puncture protection thanks to around 70% greater wall thickness giving greater protection against punctures and pinch flats
- 100% recyclable

TIRE BOOSTER

- Perfect for mounting tubeless tires, up to 11 bar pressure
- Attachable with mounting strap directly to track pump
- Only for SV valves

ART. # 6080.01

Application tips: schwalbe.com/tubeless

AIRMAX PRO

- Digital air pressure gauge, measures pressures up to 11 bar
- Suitable for AV (Auto) and SV (Presta), works on DV (Woods) with Schwalbe valve insert

ART. # 6010.01

SADDLE BAG

- Complete with tube and two tire levers

	SV	ART. #
26"	13	1653A
28"	17	1653B
27.5/29"	19	1653C
Road bike	15	1613A.02

Available for Road bike, MTB and Touring bikes.

BIKE SOAP

- Super cleaning effect & lasts for more than 100 washes.
- Only natural ingredients, biodegradable
- Starter set with soap can + organic horsehair brush

	ART. #
Starter pack	4715
Soap	4711
Soap can	4713

SOS PUMP

- Small pump for emergencies, perfect for jersey pocket or attachment to the frame
- Handy and extremely durable
- Rubber strap provides protection from dirt

ART. # 6081
85 g, Height 13 cm

DOC BLUE PROFESSIONAL

- Perfect for Schwalbe TLE tires, produced by Stan's NoTubes.
- Easy handling
- + optimal, fastest sealing

BOTTLE	ART. #
60 ml	3710.01
200 ml	3714
500 ml	3711

Dose: 60ml/tire (Race bike 3030-40ml). Effective ca. 2-7 Months. Thereafter dries to a rubber film. Can be renewed. Not effective on large defects (cuts/bursts).

EASY FIT

- Special mounting fluid for bicycle tires
- With the practical sponge, fluid can be easily and cleanly applied to tire bead

BUNDLE	ART. #
Sponge applicator 50 ml	3700
Refill 1000 ml	3701

TIRE LEVERS

- Simple assembly + disassembly of a tire

ART. # 1847
3 piece set

(10 Sets in a POS display)

GLUELESS PATCHES

- Self-adhesive patches to repair punctures in tubes (adhesive + sandpaper included)

ART. # 3900.01
6 Patches

(20 Sets in a POS display)

MULTITOOL

- 13 functions: various Allen keys, T25 Torx, slotted screwdriver, bottle opener, SV valve insert, SV valve extension, AV valve insert

ART. # 6015.01
109 g

! With anti-corrosion coating.

TREAD CUTTER

- First profile cutter for MTB tires
- Cuts precisely, with a smooth edge and at the desired height

ART. # 6025

Details for use: www.schwalbe.com/treadcutter

HIGH-PRESSURE-RIM TAPE

Central factor for puncture protection

- Effectively protects tube from damage and covers spoke holes

QUALITY LINES

EVOLUTION LINE	The very best possible. Highest grade materials. Latest technology.
PERFORMANCE LINE	Excellent quality for intensive use.
ACTIVE LINE	Reliable brand quality.

TERMINOLOGY

SUPER CONSTRUCTIONS TUBELESS	A detailed overview of our new carcasses can be found on page 12. No bicycle inner tube is needed. Tire and rim are designed to seal directly together. Tubeless tires can also be ridden with inner tubes.
TUBELESS EASY	These tires can be converted to tubeless tires using sealant. The standard for high-quality Schwalbe tires.
TUBELESS READY	Special tubeless technology for performance tires from Schwalbe, similar to Tubeless Easy.
SOUPLESSE	Stands for suppleness and lightness in gravel and road cycling. Describes the ideal feedback from the ground to the rider.
FAIR RUBBER	Schwalbe is the first tire manufacturer to offer products with fair trade rubber. On every kilo of rubber Schwalbe pays a Fair Rubber premium. This is used exclusively to improve the living conditions of small farmers and their families.

COMPOUNDS (RUBBER COMPOUND)

ADDIX	Newly developed high-performance compounds. The best rubber compounds from Schwalbe. For MTB (Speed, Speedgrip, Soft, Ultra Soft), road bike (Addix Race), e-bike tires (Addix-E) and all-weather tires (Addix 4 Season). Addix is also available in the Performance Line. Complete overview on page 15.
BLACK'N ROLL	Special rubber compound for wheelchair tires. Leaves no dark abrasion marks on indoor floors. Lasts significantly longer than a gray wheelchair compound.
DUAL	Two different rubber compounds for better performance.
ADDIX FOUR SEASON	Very versatile rubber compound, specially made for conditions throughout the year.
GRC	Gray rubber compound for wheelchair tires.
GREEN COMPOUND	The most sustainable rubber compound. With polymers exclusively from renewable and recycled raw materials.
ROLLER	Particularly suitable for training on the roller.
SBC	Schwalbe Basic Compound: The versatile quality compound for all applications.
SILICA	Special filler in the rubber compound that positively influences rolling resistance and wet grip.
WINTER	Special rubber compound for studded tires.
WHEELSTAR COMPOUND	The speed rubber compound especially for wheelchair racers.
SEAL	INFLATION

KEY		
TLE/TLR	Optimal performance (rolling resistance and puncture protection) in tubeless use with Doc Blue, alternatively usable with tube.	
TUBE ONLY	Usable with inner tube only.	
E-BIKE	Recommendation for the use of a tire on e-bikes. For normal, standard pedelecs (E-25), or with ECE-R75 test mark for fast e-bikes (E-50).	
INDEX	Applies to E-50 release.	
ECE-R75	Offers the advantage of a higher total weight due to special coding (e.g. "28B"). Indicates the maximum payload and the maximum speed. This information is a number and letter code (e.g. 28 = 100 kg) and (e.g. B = 50km/h) specified by the Federal Motor Transport Authority (KBA). Recognizable by the check digit, which begins with a circled E4 and then with 75R-...	
ECE-R88	Compared to the silver reflective strip, the black one does not quite meet the legal requirements in terms of reflection strength. If the bike is to be equipped in accordance with the StVZO, you also need approved spoke emitters. It is still a safety upgrade for sporty bikes.

B	Approval from the tire manufacturer for use on fast e-bikes, provided the total weight (person+bike+luggage) does not exceed 150kg. These tires can be used both with a tube and tubeless (TLR/TLE), provided they are approved for this..	
COMPOUND	Rubber compound	
EPI	Carcass density. Ends per inch (threads per inch). The denser the carcass, the higher the quality of the tire. A 'T' in front of the number indicates a tubular tire carcass, these are only comparable to a limited extent. Material and manufacturing methods differ significantly.	
LOAD	Maximum load capacity. Applies per tire at max. air pressure.
