FIND YOUR FAMILY. FIND YOUR TIRE.

OUR NEW CITY/TOUR PRODUCTS FOR 2027

NINE PRODUCT FAMILIES. ONE CLEAR OVERVIEW.

We have always developed suitable tires for all cyclists. Over the years, this has resulted in an increasingly diverse and carefully tailored product range.

Now, we have restructured this to make it easier for you to find your perfect tire.

From now on, each of the three major bike worlds City & Tour, Dropbar and MTB will be divided into three product families. Each family represents a clear area of use and helps you find the right tire quicker.

PERFORMANCE FOR EVERY DAY. AND FOR PROS.

We have the perfect tires for every area of use and every requirement. From reliable Schwalbe everyday companions (Schwalbe line) to high-performance tires (Schwalbe PRO line).

Schwalbe

Schwalbe tires for everyday use all offer reliable quality, outstanding performance and excellent sustainability coupled with impressive value for money.

Schwalbe PRO

When only the best is good enough, innovative high-end gear is required. Schwalbe PRO tires come into their own when secure grip or every ounce of performance matters.

CITY & TOUR

Perfect tires for every kind of classic cycling: everyday rides, urban rides, commuting and tours.

MARATHON

A MARATHON tire is a premium product that you can rely on in any situation, offering durability and made to withstand the highest level of strain. Ideal for all regular cyclists who want lasting peace of mind.

For everyday cyclists, commuters and cycle tourists.

Selected treads also available in a PRO version.

MOTION

MOTION represents everyday tires that meet individual needs. Different treads for different requirements – in the city and beyond.

For all those who like to follow their own path through everyday life.

HYBRID

HYBRID combines everyday and off-road cycling. Robust on unpaved tracks, efficient on the roads.

For SUV bikes and e-MTBs – with unlimited ride options.

This brochure presents the latest additions to the Schwalbe City/Tour range for the 2027 product year. We are making some major changes, which we would like to share with you all at once in advance.

Within the scope of our product range overhaul, we will in future only have two different product lines: the Schwalbe line and the Schwalbe PRO line. The focus lies on Schwalbe as a brand and the products, the specifications of which are tailored to the respective uses. PRO represents peak performance for the specific use case.

Here at Schwalbe, we have also decided to streamline our range. Within the scope of the changes for 2027, **we are reducing the size of the City/Tour portfolio by around 30%**. Our aim is to make it quicker and easier for cyclists to find their optimum tire while still offering them plenty of choice with products tailored to their needs.

To structure the City/Tour range more clearly, we are now dividing it into three product families: the already known MARATHON family plus the MOTION and HYBRID families.

MOTION is a new family – our everyday tires for personal expression. This offers treads for individual needs. **Hybrid** comprises crossover tires for SUVs and MTBs that can also be used for everyday rides. They combine off-road capability with outstanding ride stability. Full details from page 6.

When it comes to the compounds, we are focused on clarity and standardisation: with the exception of the PRO and winter/all-season models, our City/Tour tires will in future use our rubber compound ADDIX Green, formerly known as ADDIX Eco, or the Green Compound. For further information, please turn to page 22.

All Schwalbe tires except those with a coloured running surface now come with official e-bike approval (E-25).

**All new Tour tires are now available to order.
The official market launch takes place in summer 2026.**

FROM 2026, OUR TOUR PORTFOLIO WILL COMPRISE 3 FAMILIES

CHANGES TO THE PRODUCT

PRO LINE AND SCHWALBE LINE

The product ranges will no longer be divided into the Active, Performance and Evolution lines. The focus now lies on Schwalbe as a brand and the products. The new structure has just two tiers: the Schwalbe line (which replaces the Active and Performance lines) and the Schwalbe PRO line, with 'PRO' representing peak performance for the specific use case (and therefore replacing the former Evolution line).

VISIBLE ON THE TIRES THEMSELVES

Not only have the labels been redesigned in the new Schwalbe look, their size and the order of the information presented have also been modified:

- The name of the product family always appears first: Marathon, Motion or Hybrid
- The name is followed by the word PRO in dark blue (subject to being a PRO version)
- Next comes the model name, e.g. Almotion or Pick-Up
- Finally comes the information about the version, TLR (tubeless ready, if applicable), the size and the recommended tire pressure and maximum load (for cargo tires)

➤ **SCHWALBE MARATHON PRO** ALMOTION — TLR — 55-584 / 27.5×2.15
1.8-3.7 BAR / 26-54 PSI

➤ **SCHWALBE MOTION** PICK-UP — 65-584 / 27.5×2.60
2.0-4.0 BAR / 30-55 PSI — MAX. LOAD 170 KG

MARATHON[★]

Schwalbe MARATHON tires are a reliable choice for everyday life on two wheels, offering durability and peace of mind and made for every ride from city commutes to long cycle tours.

MARATHON

THE RIGHT SCHWALBE MARATHON EVERY TIME

URBAN

Firm to slightly changing surfaces such as asphalt, cobbles or well-surfaced paths. The focus lies on smooth running and efficient rolling.

TOUR

Uneven, loose or changing surfaces such as gravel, forest paths and trails. Grip, comfort and control are key.

WHAT LEVEL OF PUNCTURE PROTECTION SHOULD YOU CHOOSE?

Different properties are important depending on your ride style – from maximum protection to low rolling resistance for more speed. Scan the QR code to find the right level of puncture protection for your needs.

THE MARATHON FAMILY

FOR THE LONG RUN

The Marathon family has developed over the years from the very first Marathon tire, the pioneer in durability and puncture protection.

Ever since the first product, the name Marathon has represented the highest quality and the latest in tire technology. The Marathon Plus models have succeeded in always raising the bar for puncture protection. As a result, they are the only tires authorised to bear the proud description of 'flat-less' – showing they are tires you can rely on. Marathon products are at the forefront of innovation and technology.

As the family's most eco-friendly tire, the Green Marathon is consistently continuing along this path and proving that continual development is an essential part of Schwalbe's DNA.

Every Marathon tire represents a promise to customers: a premium product you can rely on in any situation!

MOTION[★]

The Schwalbe *MOTION* family comprises everyday tires for all ride types – versatile, tailored to needs and always ready. Choose your tread and ride the way you like.

THE RIGHT SCHWALBE MOTION EVERY TIME

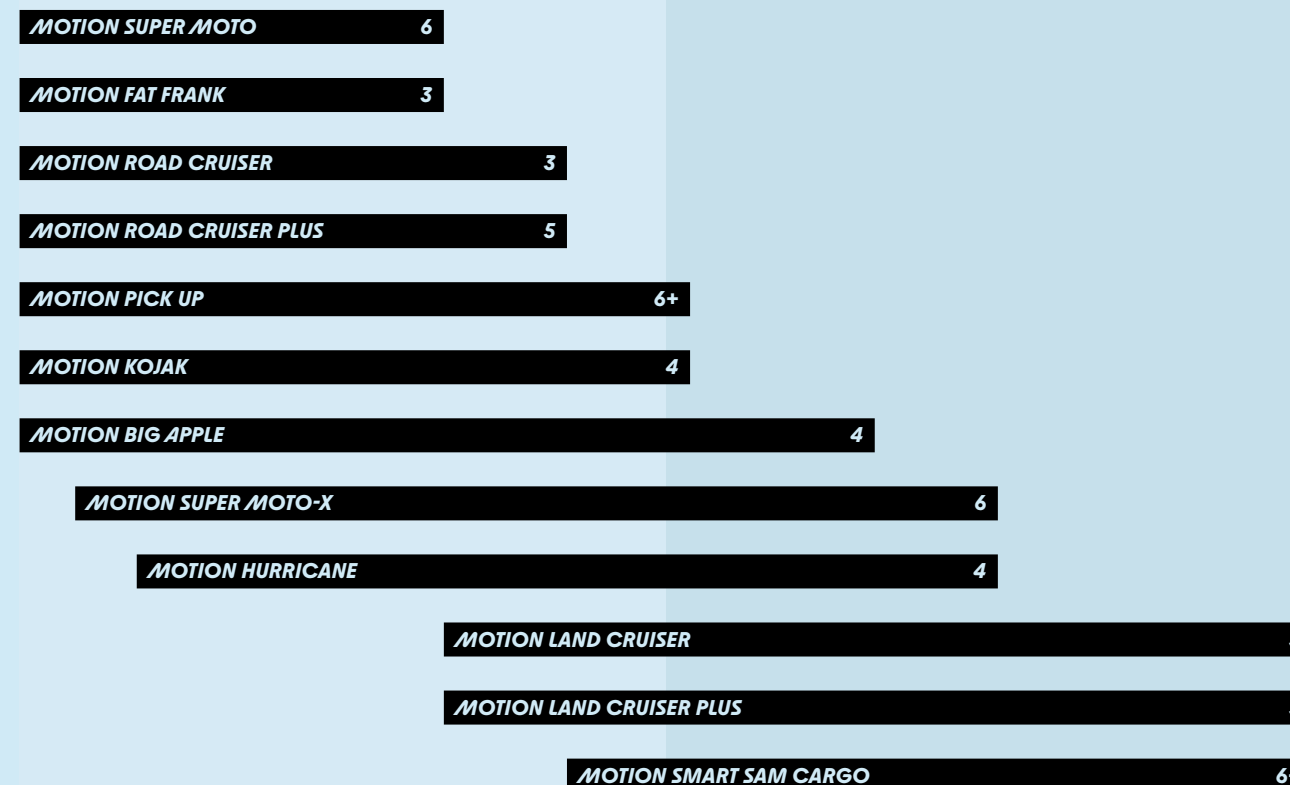

URBAN

Firm to slightly changing surfaces such as asphalt, cobbles or well-surfaced paths. The focus lies on smooth running and efficient rolling.

TOUR

Uneven, loose or changing surfaces such as gravel, forest paths and trails. Grip, comfort and control are key.

SCHWALBE PROTECTION LEVEL

WHAT LEVEL OF PUNCTURE PROTECTION SHOULD YOU CHOOSE?

Different properties are important depending on your ride style – from maximum protection to low rolling resistance for more speed. Scan the QR code to find the right level of puncture protection for your needs.

THE MOTION FAMILY

FOR EVERY DAY

The Motion family is made up of tires for personal expression, featuring a range of tread patterns for a variety of needs.

From robust, load-bearing models for demanding cargo bikes to lightweight, dynamic options for sporty urban bikes. In line with our guiding principle of offering the right tires for every bike, the range of tread patterns on the Motion models make them as suitable for the latest trends as they are for the special requirements of specific areas of use.

The Motion family is designed for all-rounders and individualists without compromising on functionality.

HYBRID

A Schwalbe HYBRID is a crossover tire for SUVs and MTBs – combining off-road robustness with everyday stability and made for all those who love varied rides.

HYBRID

THE RIGHT SCHWALBE HYBRID EVERY TIME

THE HYBRID FAMILY

FOR EVERYWHERE

The Hybrid family comprises crossover tires for SUVs and MTBs that can also be used for everyday rides.

Our Hybrid tires combine everyday and touring capabilities with off-road characteristics and puncture protection. They are ideal for SUV bikes. The balance between on-road and off-road performance varies depending on the model. Visually, they always feature an attractive tread design. Despite having a large volume like MTB tires, models in the Hybrid family still roll quietly and smoothly on asphalt.

***All tires in the Hybrid family
impress on both the road
and unpaved tracks.***

OUR DISCONTINUED MODELS AND SUITABLE ALTERNATIVES

Here at Schwalbe, we continually develop our products so that everyone always has the best for their bikes. Some models, such as the Big Ben and the Delta Cruiser (Plus), are heading into a well-deserved retirement - but we naturally already have the ideal successors ready.

MARATHON
The pioneer for puncture protection & running performance

OUR COMPOUNDS HAVE BEEN STANDARDISED

Almost all of our City/Tour tires will in future use either our rubber compound ADDIX Green, formerly known as ADDIX Eco, or the Green Compound. The only exceptions remain the PRO versions and the 365 models for very specific requirements.

ADDIX Green (formerly ADDIX Eco): our ADDIX compounds offer peak performance and durability – for running surfaces and sidewalls. ADDIX Green is our rubber compound featuring 100% recycled carbon black (including from Schwalbe's own recycling system) and renewable raw materials, including silica from rice husk ash and natural rubber.

ADDIX GREEN

GREEN COMPOUND

Our Green Compound is a rubber compound with natural rubber and a proportion of recycled rubber materials, such as from rubber gloves and door seals.

NEW PRODUCTS

FAIR RUBBER

Another change to compounds: all PRO tires (and many other models) are made using fair-trade natural rubber (Fair Rubber). Schwalbe is a member of Fair Rubber e.V. and sources natural rubber according to Fair Rubber's Fair Trade criteria (mass balance approach). More at www.fairrubber.org

NEW

SCHWALBE MARATHON PRO ALMOTION

The new yardstick: touring tires for the highest demands

- New tread with modern, solid centre pattern for smooth running and a long service life
- Grippy outer blocks offer firm traction and impressive functionality away from paved roads
- New Race PRO design combines three benefits: outstanding ride properties, minimum rolling resistance and high load capacity for long rides with luggage
- Maximum puncture protection thanks to V-Guard coupled with extremely low weight
- **NEW:** the foldable PRO version is tubeless ready (TLR) and can be used with either a tube or an appropriate tubeless setup with sealant (please note: always check the rim approval on your bike and make sure you use compatible tubeless rim tape)
- Made with recycled carbon black (rCB) from Schwalbe's in-house tire recycling system
- E-50 approval for fast pedelecs with a total weight of up to 150 kg
- Made with fair-trade natural rubber (Fair Rubber e.V.). The fair-trade rubber is allocated via a mass balance approach across the supply chain, not physically assigned to the individual tire. Info: www.fairrubber.org

NEW

SCHWALBE MARATHON ALMOTION

Our benchmark touring tire as an affordable clincher

- Same high-quality tread as the PRO Version, made with ADDIX Green for grip, smooth running and excellent durability. ADDIX Green – Schwalbe's rubber compound featuring 100% recycled carbon black (including from Schwalbe's own recycling system) and renewable raw materials, including silica from rice husk ash and natural rubber
- Clincher version for use with a tube
- Lightweight yet still puncture and tear-resistant protective layer offers a good balance between performance and protection
- Peak performance with only minor compromises in terms of weight, smooth running and puncture protection compared to the PRO Version
- E-50 approval for fast pedelecs with a total weight of up to 150 kg

SCHWALBE MARATHON PRO EFFICIENCY

The Marathon tire with the lowest rolling resistance

- Upgraded to the new Race PRO construction: fast-rolling yet robust enough for long-distance touring or urban adventures”
- Schwalbe’s fastest touring tire with the lowest rolling resistance (ADDIX Race) – also ideal for maximum e-bike range
- With fair-trade natural rubber (Fair Rubber e.V.). The fair-trade rubber is accounted for via mass balance across the supply chain rather than physically allocated to the individual tire. More information at www.fairrubber.org
- Sporty design and excellent versatility
- High-quality Marathon compound for outstanding durability
- ADDIX Race compound
- V-Guard puncture protection
- Made with recycled carbon black (rCB) from Schwalbe’s in-house tire recycling system
- Now also in a 26" version

NEW

SCHWALBE MOTION LAND CRUISER

Affordable ATB and trekking tire for on-road and off-road adventures

- New modern tread combines futuristic design features with classic all-terrain bike attributes
- Combines smooth rolling on roads with secure off-road grip
- Outstanding durability thanks to narrow centre tread
- Clean look without reflective strips for sporty 28" cross and trekking bikes and a great choice for 24", 26" & 27.5" mountain bikes and ATBs
- Solid basic puncture protection
- New size structure with 5 mm intervals
- **NEW:** now with Green Compound and E25 approval. Green Compound is a rubber compound with natural rubber and a proportion of recycled rubber materials, such as from rubber gloves and door seals.

SCHWALBE MOTION SUPER MOTO

The eye-catching e-bike tire

- Motorsport look
- Made for high speeds
- Excellent puncture protection thanks to Double Defense & RaceGuard
- Made with recycled carbon black (rCB) from Schwalbe's in-house tire recycling system
- Made with ADDIX Green - Schwalbe's rubber compound featuring 100% recycled carbon black (including from Schwalbe's own recycling system) and renewable raw materials, including silica from rice husk ash and natural rubber

SCHWALBE MOTION SMART SAM CARGO

The cargo tire for both on-road and off-road rides

- Perfect choice for outside urban regions
- Smart Sam tread guarantees low rolling resistance and safety when off-road
- Suitable for extremely high loads
- Most reliable puncture protection for cargo bikes thanks to six-layer 67-EPI Super Defense carcass
- Made with recycled carbon black (rCB) from Schwalbe's in-house tire recycling system
- Please note: if you're after maximum durability for everyday urban rides, which an off-road tread can't give you, take a look at the Schwalbe Pick Up

SCHWALBE MOTION PICK UP

The best choice for cargo bikes

- Schwalbe’s undisputed number one for cargo bikes
- Outstanding stability and safety
- Suitable for extremely high loads
- Most reliable puncture protection for cargo bikes thanks to six-layer 67-EPI Super Defense carcass
- With fair-trade natural rubber (Fair Rubber e.V.). The fair-trade rubber is accounted for via mass balance across the supply chain rather than physically allocated to the individual tire. More information at www.fairrubber.org
- Made with recycled carbon black (rCB) from Schwalbe’s in-house tire recycling system

SCHWALBE HYBRID JOHNNY WATTS

The first genuine SUV tire - now with a radial carcass

- Inclusion in the new HYBRID product family
- All versions feature a radial carcass for better grip, comfort and safety
→ the tire practically suctions to the ground by selectively flexing
- Foldable versions now available as TLR & approved for hookless rims
- Double Defense: all-round puncture protection thanks to the insert under the running surface + sidewall protection.
- Made with ADDIX Green - Schwalbe's rubber compound featuring 100% recycled carbon black (including from Schwalbe's own recycling system) and renewable raw materials, including silica from rice husk ash and natural rubber
